Safe and Accountable Robotics Act of 2026

Discussion Draft v0.1, prepared October 13, 2026 by M. Bagus Prabowo (not an introduced bill)

DRAFTER'S NOTE (not part of the bill text)

Purpose. This is a federal framework bill for physical, AI-enabled robots ("embodied AI"). It is written for the 119th Congress, 2d Session, as the law actually stands in October 2026. It does not assume any future technology or statute.

The 2026 baseline it builds on

- **No federal robotics statute exists.** OSHA states it has no robotics-specific standard and enforces robot safety through the General Duty Clause (29 U.S.C. 654(a)(1)), machine guarding (29 CFR 1910.212), and lockout/tagout (29 CFR 1910.147).
- **The consensus standard is ANSI/A3 R15.06-2025**, the national adoption of ISO 10218-1:2025 and ISO 10218-2:2025, plus a new Part 3 for robot-cell users. ISO 25785-1 (dynamically stable industrial mobile robots, including legged and humanoid robots) is still a committee draft.
- **FCC Covered List (July 27, 2026).** An interagency national security determination placed "foreign-produced advanced robotics devices" on the FCC Covered List under the Secure and Trusted Communications Networks Act of 2019, blocking new equipment authorizations unless the Department of War grants an exemption. "Foreign-produced" is tied to the Buy American Act domestic-end-product test (more than 65% domestic component cost, rising to 75% in 2029). Fixed industrial arms, connected vehicles, and certain surgical instruments are excluded.
- **Section 232.** Commerce's investigation into imports of robotics and industrial machinery (opened September 2, 2025; 90 FR 46382) had no announced proclamation as of the most recent public checks (September to October 2026).
- **Pending robotics bills:** Humanoid ROBOT Act (S. 3275, Cassidy–Coons; NDAA amendment text in the Congressional Record, June 24, 2026); American Security Robotics Act of 2026 (S. 4235, Cotton; procurement ban on covered unmanned ground systems); GUARD Act of 2026 (H.R. 9129, Moolenaar–Obernolte–McClellan); National Commission on Robotics Act (H.R. 7334; S. 4686); a robotics-industry development bill (S. 5310, Rounds–Hickenlooper).
- **AI preemption.** Executive Order 14365 (December 11, 2025) created the DOJ AI Litigation Task Force (January 9, 2026). The White House National Policy Framework for AI (March 20, 2026) asked Congress for preemption, sandboxes, and child safety. The House discussion draft "Great American AI Act of 2026" (Obernolte–Trahan) would preempt state model-development laws for three years while leaving deployment and use to the States. No federal AI preemption statute has been enacted.
- **Autonomous vehicles.** NHTSA's AV Framework (April 2025) has expanded Part 555 exemptions, granting Zoox the first commercial robotaxi exemption on July 31, 2026, and has

opened FMVSS modernization rulemakings in 2026. SELF DRIVE Act of 2026 (H.R. 7390) is pending. This bill leaves motor vehicles to NHTSA.

- **Trade Adjustment Assistance for Workers** has been in termination since July 1, 2022. No federal program targets workers displaced by automation.

Design choices

1. **Robots are property, never persons.** The bill amends the Dictionary Act (1 U.S.C. 1) to say so. "The robot did it" is barred as a defense.
2. **No new independent agency.** A National Robotics Safety Office sits in Commerce and coordinates the agencies that already have jurisdiction: CPSC, OSHA, NIST/CAISI, FCC, BIS, FTC, NHTSA, FDA, and FAA. This is the politically realistic path in 2026.
3. **Three tiers plus prohibited uses.** Obligations scale with mass, speed, proximity to people, and how much safety-relevant behavior is learned rather than engineered.
4. **Split federalism.** Federal design and performance standards are a *ceiling*: one national product standard, matching the preemption direction Congress is weighing. Operation and use rules (sidewalks, zoning, local police) and worker and consumer protections are a *floor* that States may exceed. State tort law is saved.
5. **Workers and owners.** It amends WARN, creates Automation Adjustment Assistance, directs a real OSHA robotics standard, and gives owners rights against remote disablement. These close the distributive gaps a safety-only law leaves open.
6. **Teleoperation.** Remote operation from abroad is lawful but runs through a U.S.-domiciled responsible operator. It is barred from covered nations (10 U.S.C. 4872), consistent with existing FCC, CFIUS, and data-transfer policy.

Items to verify before introduction: the U.S. Code placement of PADFA (Division I of Public Law 118–50); current inflation-adjusted CPSA civil penalty caps; whether the Department of Defense's secondary name requires statutory references to change (this draft uses the statutory "Secretary of Defense"); and the status of the Section 232 action. Dollar figures, thresholds, and deadlines in brackets are drafter's proposals for negotiation.

119th CONGRESS 2d Session

H. R. _____

To establish a national framework for the safety, accountability, security, and responsible deployment of robots and embodied artificial intelligence systems, to protect workers, consumers, and owners, and for other purposes.

IN THE HOUSE OF REPRESENTATIVES

_____ ___, 2026

M___. _____ introduced the following bill; which was referred to the Committee on Energy and Commerce, and in addition to the Committees on Education and Workforce, Ways and Means, the Judiciary, and Homeland Security, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned

A BILL

To establish a national framework for the safety, accountability, security, and responsible deployment of robots and embodied artificial intelligence systems, to protect workers, consumers, and owners, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Safe and Accountable Robotics Act of 2026" or the "SARA Act".

(b) TABLE OF CONTENTS.—The table of contents for this Act is as follows:

- Sec. 1. Short title; table of contents.
- Sec. 2. Findings.
- Sec. 3. Purposes.
- Sec. 4. Definitions.
- Sec. 5. Scope and exclusions.

TITLE I—LEGAL STATUS AND RESPONSIBILITY

- Sec. 101. Robots not persons.
- Sec. 102. Responsible persons.
- Sec. 103. Autonomy not a defense.

TITLE II—NATIONAL ROBOTICS SAFETY OFFICE

- Sec. 201. Establishment.
- Sec. 202. Functions.
- Sec. 203. Interagency coordination and memoranda of understanding.
- Sec. 204. Robotics Safety Advisory Committee.

TITLE III—RISK TIERS AND PROHIBITED USES

- Sec. 301. Risk tiers.
- Sec. 302. Prohibited robots and uses.
- Sec. 303. Human decision requirement.

TITLE IV—IDENTIFICATION, REGISTRATION, AND REMOTE IDENTIFICATION

- Sec. 401. Robot identification number.
- Sec. 402. National Robot Registry.
- Sec. 403. Remote identification in public spaces.

TITLE V—SAFETY STANDARDS, CONFORMITY ASSESSMENT, AND INCIDENT REPORTING

- Sec. 501. Federal robot safety standards.
- Sec. 502. Minimum safety features.
- Sec. 503. Conformity assessment.
- Sec. 504. Safety case for Tier 3 robots.
- Sec. 505. Software updates and behavioral change.
- Sec. 506. Incident reporting.
- Sec. 507. Recalls and stop-operation orders.

- Sec. 508. Cybersecurity.

TITLE VI—DUTIES OF MANUFACTURERS, IMPORTERS, DEPLOYERS, AND REMOTE OPERATORS

- Sec. 601. Manufacturers.
- Sec. 602. Importers and foreign manufacturers.
- Sec. 603. Deployers.
- Sec. 604. Remote operation and cross-border teleoperation.

TITLE VII—ACCOUNTABILITY AND COMPENSATION

- Sec. 701. Financial responsibility.
- Sec. 702. Event data preservation and access.
- Sec. 703. Presumptions in civil actions.
- Sec. 704. Contractual waivers void.
- Sec. 705. Federal civil action for noncompliance.
- Sec. 706. Savings clause for State tort law.

TITLE VIII—WORKERS AND THE TRANSITION TO AUTOMATION

- Sec. 801. OSHA robotics standard.
- Sec. 802. Worker safety rights.
- Sec. 803. Automation notice; amendments to the WARN Act.
- Sec. 804. Bargaining over effects of automation.
- Sec. 805. Automation Adjustment Assistance.
- Sec. 806. Limits on robot-enabled workplace surveillance.
- Sec. 807. Offshore teleoperation labor study and reporting.

TITLE IX—CONSUMERS, OWNERS, AND THE HOME

- Sec. 901. Disclosure that a machine is a robot.
- Sec. 902. Data in the home.
- Sec. 903. Children and vulnerable persons.
- Sec. 904. Owner rights; no remote disablement.
- Sec. 905. Support period and end-of-support obligations.
- Sec. 906. Repair.
- Sec. 907. Accessibility.
- Sec. 908. Enforcement by the Federal Trade Commission.

TITLE X—NATIONAL SECURITY, TRADE, AND SUPPLY CHAIN

- Sec. 1001. Covered nation restrictions.
- Sec. 1002. Relationship to Covered List, export controls, and CFIUS.
- Sec. 1003. Supply chain transparency.
- Sec. 1004. Federal procurement.

TITLE XI—PUBLIC SAFETY AND LAW ENFORCEMENT ROBOTS

- Sec. 1101. Use of force by robots.
- Sec. 1102. Grant condition and reporting.

TITLE XII—INNOVATION AND DEPLOYMENT

- Sec. 1201. Robotics Deployment Pilot Program.

- Sec. 1202. National robotics testbeds.
- Sec. 1203. Small business compliance assistance.
- Sec. 1204. Workforce and education.

TITLE XIII—FEDERAL–STATE RELATIONSHIP

- Sec. 1301. Preemption of State product standards.
- Sec. 1302. Preservation of State and local authority.
- Sec. 1303. No commandeering.

TITLE XIV—ENFORCEMENT

- Sec. 1401. Prohibited acts.
- Sec. 1402. Civil penalties.
- Sec. 1403. Criminal penalties.
- Sec. 1404. Injunctive relief and State attorneys general.
- Sec. 1405. Whistleblower protection.

TITLE XV—MISCELLANEOUS

- Sec. 1501. Rulemaking; deadlines.
- Sec. 1502. Effective dates and transition.
- Sec. 1503. Reports and review.
- Sec. 1504. Authorization of appropriations.
- Sec. 1505. Severability.

SEC. 2. FINDINGS.

Congress finds the following:

(1) Robots that combine physical mobility or manipulation with artificial intelligence are moving out of fenced factory cells and into warehouses, hospitals, sidewalks, stores, and homes, where they operate near members of the public who have not been trained or consented to share space with them.

(2) No Federal statute specifically governs the safety of robots. The Occupational Safety and Health Administration has no robotics-specific standard and relies on the general duty clause and general machine-guarding and hazardous-energy rules. The principal consensus standard, ANSI/A3 R15.06–2025, adopting ISO 10218–1:2025 and ISO 10218–2:2025, addresses industrial robots and was not written for legged, humanoid, or general-purpose mobile robots operating among the public. An international standard for dynamically stable mobile robots remains in draft.

(3) Robots increasingly rely on learned control policies whose behavior can change through software updates or continued training after sale, which makes it harder for an injured person to identify and prove a specific defect and opens a gap between the harm and any human decision.

(4) The law of every State treats robots as personal property. Congress affirms that rule. Responsibility for what a robot does must always rest with identifiable persons, and the autonomy of a machine must never become a means of escaping liability.

(5) Robots can be operated remotely from anywhere in the world. Remote operation from outside the United States can create risks to safety, privacy, and national security, and can place labor performed for the United States market outside the reach of Federal labor law.

(6) The Federal Government has determined that certain foreign-produced advanced robotics devices pose unacceptable national security risks, and Congress is considering measures on humanoid robots produced in or controlled by foreign adversary nations. A coherent civilian safety and accountability framework should operate alongside these measures without duplicating them.

(7) Automation can raise productivity and wages and can relieve workers of dangerous work, but it also displaces workers. The Trade Adjustment Assistance for Workers program has been in termination since July 1, 2022, and no Federal program is designed to assist workers whose jobs are eliminated by automation.

(8) Federal tax law already encourages investment in robotic capital equipment. Fairness requires that the Federal Government also invest in the workers and communities affected by that equipment.

(9) Purchasers of robots increasingly own the hardware while the manufacturer retains control of the software, including the ability to disable paid-for functions remotely or to end software support, which undermines the property rights of owners.

(10) A single set of national design and performance standards for robots sold in interstate commerce will promote safety and competitiveness. States and localities retain their traditional authority to regulate where and how robots operate on public property, to protect workers and consumers, and to provide remedies through tort law.

(11) Congress has authority to enact this Act under the Commerce Clause, the Spending Clause, and the Necessary and Proper Clause of article I, section 8 of the Constitution.

SEC. 3. PURPOSES.

The purposes of this Act are—

(1) to protect the life, health, and dignity of every person who works with, lives with, or encounters a robot;

(2) to ensure that responsibility for every robot rests with an identifiable person;

(3) to establish risk-proportionate national safety standards, registration, and incident reporting;

(4) to ensure prompt and fair compensation for persons harmed by robots;

(5) to support workers through the transition to automation and to protect the property rights of owners;

(6) to safeguard national security in robotics supply chains and remote operation; and

(7) to sustain United States leadership in robotics through clear, predictable rules.

SEC. 4. DEFINITIONS.

In this Act:

(1) ADMINISTRATOR.—The term “Administrator” means the Administrator of the National Robotics Safety Office established under section 201.

(2) ARTIFICIAL INTELLIGENCE.—The term "artificial intelligence" has the meaning given the term in section 5002 of the National Artificial Intelligence Initiative Act of 2020 (15 U.S.C. 9401).

(3) AUTONOMOUS OPERATION.—The term "autonomous operation" means operation of a robot in which the robot selects or executes physical actions without contemporaneous command by a human for each action.

(4) COVERED NATION.—The term "covered nation" has the meaning given the term in section 4872 of title 10, United States Code.

(5) COVERED ROBOT.—The term "covered robot" means a robot to which this Act applies under section 5.

(6) DEPLOYER.—The term "deployer" means a person that operates, directs the operation of, or makes available for operation a covered robot, other than solely for personal, family, or household purposes. The term includes a person that offers robots as a service.

(7) DWELLING.—The term "dwelling" means a residence, including a residential care facility.

(8) EMBODIED ARTIFICIAL INTELLIGENCE SYSTEM.—The term "embodied artificial intelligence system" means an artificial intelligence system whose outputs directly cause, or are used to command, physical motion or force in the physical world.

(9) EVENT DATA RECORDER.—The term "event data recorder" means a function or device installed in or connected to a robot that records the data specified under section 502(a)(3).

(10) HUMANOID ROBOT.—The term "humanoid robot" means a robot with a body configuration that approximates human form, including bipedal locomotion or two arms with articulated end effectors mounted on a torso.

(11) IMPORTER.—The term "importer" means a person that imports a covered robot into the customs territory of the United States, including the importer of record.

(12) INCIDENT.—The term "incident" means an event involving a covered robot that results in, or that a reasonable person would conclude could have resulted in, death, bodily injury, significant property damage, unauthorized access to or control of the robot, or a failure of a required safety function.

(13) LEARNED BEHAVIOR.—The term "learned behavior" means robot behavior generated by a model whose parameters were derived wholly or partly from data through machine learning, including behavior acquired or modified after the robot was first sold.

(14) MANUFACTURER.—The term "manufacturer" means a person that manufactures, assembles, or substantially modifies a covered robot, or that places its name or mark on a covered robot, and includes a person that supplies the embodied artificial intelligence system that controls a covered robot's motion if that person markets the system for use in covered robots.

(15) OWNER.—The term "owner" means the person holding title to a covered robot, including a lessee under a lease of 4 months or longer.

(16) PUBLIC SPACE.—The term "public space" means any place generally open to the public, including a street, sidewalk, park, transit facility, and the publicly accessible area of a business.

(17) REMOTE OPERATOR.—The term "remote operator" means an individual who, from a location not physically adjacent to a robot, commands, supervises with authority to intervene in, or assumes control of the robot's physical actions.

(18) RESPONSIBLE PERSON.—The term "responsible person" means the person designated under section 102.

(19) ROBOT.—The term "robot" means a physical machine that—

(A) senses its environment through one or more sensors;

(B) processes sensor data by means of onboard or remote computation, including an embodied artificial intelligence system; and

(C) acts on the physical world through actuators that produce locomotion or manipulation,

with some degree of autonomous operation or remote operation.

(20) ROBOT IDENTIFICATION NUMBER.—The term "robot identification number" or "RIN" means the number assigned under section 401.

(21) SAFETY FUNCTION.—The term "safety function" means a function of a robot whose failure would increase the risk of death or bodily injury, including the functions listed in section 502.

(22) SECRETARY.—The term "Secretary" means the Secretary of Commerce.

(23) SERIOUS BODILY INJURY.—The term "serious bodily injury" has the meaning given the term in section 1365(h) of title 18, United States Code.

(24) TIER 1, TIER 2, AND TIER 3 ROBOT.—The terms "Tier 1 robot", "Tier 2 robot", and "Tier 3 robot" mean a covered robot classified under section 301.

SEC. 5. SCOPE AND EXCLUSIONS.

(a) IN GENERAL.—Except as provided in subsection (b), this Act applies to any robot that is manufactured in, imported into, sold or offered for sale in, or operated in the United States, and to remote operation of any such robot from any location.

(b) EXCLUSIONS.—This Act does not apply to—

(1) a motor vehicle, as defined in section 30102 of title 49, United States Code, including a vehicle equipped with an automated driving system;

(2) an unmanned aircraft or aircraft, as defined in section 44801 or 40102 of title 49, United States Code;

(3) a vessel, as defined in section 3 of title 1, United States Code;

(4) a device, as defined in section 201(h) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(h)), to the extent regulated as a device by the Food and Drug Administration;

(5) a robot owned or operated by the Department of Defense or an element of the intelligence community for military or intelligence purposes;

(6) a robot used exclusively for research in a laboratory not open to the public; or

(7) a toy that is incapable of exerting force sufficient to cause bodily injury, as determined by rule.

(c) DELIVERY ROBOTS AND OTHER LOW-SPEED SIDEWALK DEVICES.—A robot designed to travel on sidewalks or pedestrian areas is a covered robot and not a motor vehicle for purposes of this Act, notwithstanding any State law that classifies the robot differently for traffic purposes.

(d) INDUSTRIAL ROBOTS IN SEGREGATED CELLS.—A stationary industrial robot operated only within a safeguarded cell that complies with the standard issued under section 801 is subject to titles I, VII, VIII, X, and XIV of this Act and is not subject to titles IV and IX.

(e) ROBOTS ALSO REGULATED UNDER OTHER LAW.—Where a covered robot or its function is also subject to regulation by another Federal agency, the Administrator and that agency shall allocate responsibility under section 203, and compliance with a requirement of the other agency that the Administrator determines is at least as protective satisfies the corresponding requirement of this Act.

TITLE I—LEGAL STATUS AND RESPONSIBILITY

SEC. 101. ROBOTS NOT PERSONS.

(a) AMENDMENT TO DICTIONARY ACT.—Section 1 of title 1, United States Code, is amended by inserting after the paragraph defining "person" and "whoever" the following:

"the words 'person', 'individual', and 'whoever' do not include a robot, an artificial intelligence system, or any software, machine, or combination thereof, regardless of its capabilities, autonomy, or resemblance to a human being;".

(b) PROPERTY.—A robot is personal property. Nothing in Federal law shall be construed to confer on a robot or artificial intelligence system any legal right, standing, capacity to own property, capacity to contract, capacity to sue or be sued, or criminal or civil liability.

(c) RULE OF CONSTRUCTION.—Nothing in this section—

(1) limits the liability of any person for harm involving a robot;

(2) prevents a person from holding property, entering into contracts, or obtaining insurance in connection with a robot; or

(3) affects any law protecting animals.

SEC. 102. RESPONSIBLE PERSONS.

(a) REQUIREMENT.—Each Tier 2 robot and Tier 3 robot shall at all times have a responsible person recorded in the National Robot Registry who—

(1) is a citizen or lawful permanent resident of the United States or an entity organized under the laws of a State or the United States with a principal place of business in the United States;

(2) is not owned by, controlled by, or subject to the jurisdiction or direction of a covered nation; and

(3) maintains an agent for service of process in the United States.

(b) DEFAULT DESIGNATION.—Unless another eligible person is designated with that person's written consent—

(1) the deployer is the responsible person for a robot operated by a deployer; and

(2) the owner is the responsible person for any other robot.

(c) DUTIES.—The responsible person shall ensure that the robot is operated in compliance with this Act, respond to orders of the Administrator, and serve as the point of contact for incidents involving the robot.

(d) EFFECT.—Designation as a responsible person does not relieve any manufacturer, importer, deployer, owner, or remote operator of any duty or liability under this Act or other law.

SEC. 103. AUTONOMY NOT A DEFENSE.

In any civil action, administrative proceeding, or criminal prosecution under Federal law, and in any civil action under State law, arising from harm involving a robot, it shall not be a defense, and shall not by itself break the chain of causation, that—

(1) the harm resulted from autonomous operation or learned behavior;

(2) the specific action of the robot was not intended, programmed, or foreseen by any person; or

(3) the robot's behavior changed after sale through learning or an update,

except that this section does not create liability where none would otherwise exist under applicable law.

TITLE II—NATIONAL ROBOTICS SAFETY OFFICE

SEC. 201. ESTABLISHMENT.

(a) IN GENERAL.—There is established within the Department of Commerce the National Robotics Safety Office (in this Act referred to as the "Office").

(b) ADMINISTRATOR.—The Office shall be headed by an Administrator, who shall be appointed by the President, by and with the advice and consent of the Senate, from among individuals with expertise in robotics, engineering, safety, or regulation, and who shall report to the Secretary.

(c) CO-LOCATION WITH NIST.—The Administrator shall carry out technical functions of the Office through the National Institute of Standards and Technology, including the Center for AI Standards and Innovation, to the maximum extent practicable.

SEC. 202. FUNCTIONS.

The Administrator shall—

(1) issue rules classifying robots into tiers under section 301;

(2) establish and maintain the National Robot Registry under section 402;

(3) issue Federal robot safety standards under section 501, in coordination with the agencies listed in section 203;

(4) recognize conformity assessment bodies under section 503;

(5) receive and analyze incident reports, conduct safety investigations, and publish anonymized incident data;

(6) issue recall and stop-operation orders under section 507;

(7) administer the Robotics Deployment Pilot Program under section 1201;

(8) enforce this Act except where enforcement is assigned to another agency; and

(9) report annually to Congress on robot safety, incidents, and deployment in the United States.

SEC. 203. INTERAGENCY COORDINATION AND MEMORANDA OF UNDERSTANDING.

(a) MEMORANDA REQUIRED.—Not later than 1 year after the date of enactment of this Act, the Administrator shall enter into a memorandum of understanding with each of the following, allocating responsibility to avoid duplicative regulation:

(1) The Consumer Product Safety Commission, regarding robots that are consumer products under section 3 of the Consumer Product Safety Act (15 U.S.C. 2052). The Commission retains its authority under that Act, and a Federal robot safety standard applicable to a consumer product shall be issued jointly or with the Commission's concurrence.

(2) The Assistant Secretary of Labor for Occupational Safety and Health, regarding robots used in places of employment.

(3) The Federal Communications Commission, regarding equipment authorization and the Covered List.

(4) The Under Secretary of Commerce for Industry and Security, regarding export controls and imports.

(5) The Federal Trade Commission, regarding title IX.

(6) The Administrator of the National Highway Traffic Safety Administration, the Commissioner of Food and Drugs, and the Administrator of the Federal Aviation Administration, regarding boundary cases under section 5(b).

(7) The Secretary of Homeland Security, acting through the Director of the Cybersecurity and Infrastructure Security Agency and the Commissioner of U.S. Customs and Border Protection.

(b) SINGLE POINT OF REPORTING.—The memoranda shall provide that an incident report submitted to the Office satisfies any parallel reporting obligation to a party agency for the same incident, and the Office shall transmit the report to that agency within 1 business day.

SEC. 204. ROBOTICS SAFETY ADVISORY COMMITTEE.

(a) ESTABLISHMENT.—The Administrator shall establish a Robotics Safety Advisory Committee of not more than 21 members, including representatives of manufacturers, small businesses, deployers, labor organizations representing workers who work alongside robots, consumer and disability advocates, insurers, State and local governments, standards development organizations, and academic experts in robotics, ethics, and law.

(b) DUTIES.—The Committee shall advise on tier classification, standards, emerging risks, and the reports required under section 1503.

(c) FACA.—Chapter 10 of title 5, United States Code, shall apply to the Committee.

TITLE III—RISK TIERS AND PROHIBITED USES

SEC. 301. RISK TIERS.

(a) CLASSIFICATION BY RULE.—Not later than 18 months after the date of enactment of this Act, the Administrator shall issue a rule classifying covered robots into the following tiers on the basis of mass, speed, force, energy, operating environment, proximity to and contact with persons, degree of autonomous operation, and reliance on learned behavior for safety functions.

(b) TIER 1 (LOW RISK).—A covered robot that is not a Tier 2 or Tier 3 robot.

(c) TIER 2 (PUBLIC- OR HOME-INTERACTIVE).—Unless reclassified by rule, a covered robot that—

(1) operates in a public space, a dwelling, or a shared workspace without physical separation from persons; and

(2) has a mass of [10] kilograms or more or a maximum speed of [1.5] meters per second or more,

including sidewalk delivery robots, service robots in retail and hospitality, collaborative industrial robots, and robots operated by remote operators.

(d) TIER 3 (HIGH CONSEQUENCE).—Unless reclassified by rule, a covered robot that—

(1) is a humanoid robot or legged robot with a mass of [35] kilograms or more operating in a public space, a dwelling, or a shared workspace without physical separation from persons;

(2) has, as a primary function, intentional physical contact with the human body, including lifting, transferring, bathing, or restraining a person, other than a device under section 5(b)(4);

(3) performs security, patrol, or crowd functions in a public space;

(4) operates within critical infrastructure, as defined in section 1016(e) of the USA PATRIOT Act (42 U.S.C. 5195c(e)), in a function whose failure could cause death or serious bodily injury; or

(5) relies on learned behavior to perform a safety function without an independently verified safety envelope that bounds the robot's motion, force, and speed regardless of the learned behavior.

(e) REVIEW.—The Administrator shall review the classification rule not less often than every 2 years, after public notice and comment, and may reclassify categories of robots in either direction on the basis of incident data and technical evidence.

SEC. 302. PROHIBITED ROBOTS AND USES.

(a) PROHIBITIONS.—Except as provided in subsection (b), no person may manufacture, import, sell, offer for sale, deploy, or operate in the United States a robot that—

(1) is equipped or readily convertible to be equipped with a firearm, destructive device, or other weapon capable of causing death or serious bodily injury;

(2) is designed or operated to exploit the age, disability, or cognitive impairment of a person in order to materially distort the person's behavior in a manner that causes or is likely to cause the person physical, psychological, or financial harm;

(3) is designed to impersonate a specific, identifiable individual without that individual's express written consent;

(4) is designed in the likeness of a minor and intended for sexual use; or

(5) has had a required safety function disabled or defeated, other than temporarily for maintenance under a documented lockout procedure.

(b) EXCEPTIONS.—Subsection (a)(1) does not apply to—

(1) a robot excluded under section 5(b)(5);

(2) a robot owned and operated by a Federal, State, or local law enforcement agency in compliance with title XI; or

(3) a robot used solely for explosive ordnance disposal by a qualified public agency or its contractor.

SEC. 303. HUMAN DECISION REQUIREMENT.

No covered robot may be deployed to make, without the contemporaneous authorization of an accountable human, a decision to apply force against a person that is likely to cause bodily injury, other than force inherent in a safety function, such as stopping, that reduces risk to that person.

TITLE IV—IDENTIFICATION, REGISTRATION, AND REMOTE IDENTIFICATION

SEC. 401. ROBOT IDENTIFICATION NUMBER.

(a) REQUIREMENT.—Each Tier 2 robot and Tier 3 robot manufactured for sale or imported into the United States after the applicable effective date shall bear a unique robot identification number assigned under a system established by the Administrator.

(b) MARKING.—The RIN shall be—

(1) permanently and visibly marked on the robot in a manner resistant to removal or alteration; and

(2) stored electronically in the robot in a manner that can be read by the Office and by law enforcement agencies with appropriate tools.

(c) STANDARDS.—In establishing the RIN system, the Administrator shall consider existing identification systems, including vehicle identification numbers under part 565 of title 49, Code of Federal Regulations, and international practice.

SEC. 402. NATIONAL ROBOT REGISTRY.

(a) ESTABLISHMENT.—The Administrator shall establish an electronic National Robot Registry.

(b) REGISTRATION.—Before a Tier 2 robot or Tier 3 robot is first operated in the United States, and within 30 days after any transfer of ownership or change of responsible person, the responsible person shall register or update the robot's—

(1) RIN, manufacturer, model, and software version;

(2) owner and responsible person, with contact information;

(3) tier and conformity assessment record; and

(4) for a Tier 3 robot, proof of financial responsibility under section 701 and the general location of operation.

(c) PUBLIC ACCESS.—The Administrator shall make available to the public, through a lookup by RIN, the robot's manufacturer, model, tier, conformity status, open recalls, and the name of any responsible person that is not an individual. Information identifying an individual owner shall be available only to Federal, State, and local governmental entities for safety, law enforcement, and recall purposes and to a person who has suffered injury or property damage involving the robot.

(d) PRIVACY.—The Registry shall not collect location or operational data except as required by subsection (b)(4). Section 552a of title 5, United States Code, applies to Registry records.

(e) FEES.—The Administrator may establish reasonable registration fees, not to exceed the cost of operating the Registry, with reduced fees for individuals and small business concerns.

SEC. 403. REMOTE IDENTIFICATION IN PUBLIC SPACES.

(a) REQUIREMENT.—A Tier 2 robot or Tier 3 robot operating in a public space shall broadcast or otherwise make available, by a means specified by rule, its RIN and whether it is under autonomous operation or remote operation.

(b) MODEL.—In issuing rules under this section, the Administrator shall consider the remote identification requirements for unmanned aircraft under part 89 of title 14, Code of Federal Regulations, and shall ensure that a member of the public can identify a robot using a commonly available personal device.

TITLE V—SAFETY STANDARDS, CONFORMITY ASSESSMENT, AND INCIDENT REPORTING

SEC. 501. FEDERAL ROBOT SAFETY STANDARDS.

(a) AUTHORITY.—The Administrator, in accordance with section 203, shall issue Federal robot safety standards that are performance-based, objective, and practicable, and that address the risks of death and bodily injury posed by covered robots.

(b) CONSENSUS STANDARDS.—In accordance with section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note), the Administrator shall use voluntary consensus standards where they exist and meet the purposes of this Act, including ANSI/A3 R15.06–2025, ISO 13482, and successor or emerging standards for mobile and dynamically stable robots, and may incorporate such standards by reference.

(c) INITIAL STANDARDS.—Not later than 3 years after the date of enactment of this Act, the Administrator shall issue initial standards for Tier 2 robots and Tier 3 robots.

(d) INTERIM COMPLIANCE.—Until the applicable initial standard takes effect, a manufacturer shall design Tier 2 robots and Tier 3 robots in accordance with applicable consensus standards and the minimum safety features in section 502, and shall document the basis for its conformity determination.

SEC. 502. MINIMUM SAFETY FEATURES.

(a) REQUIRED FEATURES.—Each Tier 2 robot and Tier 3 robot shall have—

(1) an emergency stop function that a person near the robot can readily identify and activate, and that, for a robot operating in a public space, can also be activated remotely by the responsible person;

(2) a fail-safe response that brings the robot to a minimal-risk condition upon loss of communications, loss of power, sensor failure, or detection of an internal fault;

(3) an event data recorder that records, for a period specified by rule preceding and following an incident, the robot's software version, mode of operation, commands received, identity of any remote operator, sensor-derived state, and activation of safety functions, in a tamper-evident format;

(4) limits on force, speed, and operating area appropriate to the environment, enforced by a safety-rated function independent of learned behavior for a Tier 3 robot; and

(5) clear visual or auditory indication of the robot's operating state and intended direction of travel when moving in a public space.

(b) NO DEFEAT.—No person may sell, install, or use a device or software designed to disable or defeat a feature required by this section.

SEC. 503. CONFORMITY ASSESSMENT.

(a) TIER 2.—A manufacturer of a Tier 2 robot shall certify, on the basis of testing and documentation, that the robot conforms to applicable standards. The Administrator may require verification by a recognized body for categories with elevated incident rates.

(b) TIER 3.—A Tier 3 robot may not be sold, offered for sale, or deployed unless a conformity assessment body recognized by the Administrator has certified that the robot conforms to applicable standards and has reviewed the safety case required by section 504.

(c) RECOGNITION.—The Administrator shall recognize conformity assessment bodies on the basis of competence, independence, and accreditation. The Administrator shall consider the Nationally Recognized Testing Laboratory program under section 1910.7 of title 29, Code of Federal Regulations, and may recognize such laboratories for robot categories within their competence.

(d) INDEPENDENCE.—A conformity assessment body may not be owned or controlled by the manufacturer whose robot it assesses, or by a covered nation.

SEC. 504. SAFETY CASE FOR TIER 3 ROBOTS.

(a) REQUIREMENT.—The manufacturer of a Tier 3 robot shall prepare, maintain, and update a safety case for each model and each safety-relevant software version.

(b) CONTENTS.—A safety case is a structured, evidence-based argument that the robot is acceptably safe for its intended operating environment, and shall include—

(1) the intended and reasonably foreseeable uses and misuses;

(2) a hazard analysis and risk assessment;

(3) a description of how learned behavior is bounded by safety-rated functions;

(4) testing, simulation, and field data supporting the argument, including performance in the presence of children, older adults, and persons with disabilities; and

(5) the cybersecurity measures required by section 508.

(c) SUBMISSION.—The manufacturer shall submit the safety case to the conformity assessment body and shall provide it to the Administrator upon request. Information in a safety case that is a trade secret or confidential commercial information is protected under section 552(b)(4) of title 5, United States Code.

SEC. 505. SOFTWARE UPDATES AND BEHAVIORAL CHANGE.

(a) SAFETY-RELEVANT UPDATES.—Before deploying a software update, retrained model, or configuration change that alters a safety function or materially alters the motion behavior of a Tier 3 robot, the manufacturer shall update the safety case and obtain reassessment under section 503(b), except that an update necessary to correct an imminent safety hazard may be deployed immediately with notice to the Administrator within 72 hours and reassessment within 60 days.

(b) CONTINUOUS LEARNING IN THE FIELD.—A Tier 3 robot may modify its own learned behavior after sale only within bounds that were assessed under section 503(b) and that are enforced by a safety-rated function.

(c) RECORDS.—A manufacturer shall maintain a record of each software version deployed to each Tier 2 robot and Tier 3 robot for not less than [10] years.

SEC. 506. INCIDENT REPORTING.

(a) MANUFACTURERS AND RESPONSIBLE PERSONS.—A manufacturer or responsible person that obtains information reasonably indicating that a covered robot was involved in an incident shall report it to the Office—

(1) not later than 24 hours after obtaining the information, if the incident involved death or serious bodily injury; and

(2) not later than 10 days after obtaining the information, for any other incident involving a Tier 2 robot or Tier 3 robot.

(b) CONTENTS.—A report shall include the RIN, mode of operation, software version, a description of the incident, and preservation of event data recorder data under section 702.

(c) PUBLIC DATABASE.—The Administrator shall maintain a publicly accessible database of incident reports, with personal information and confidential commercial information removed, in a manner consistent with the SaferProducts.gov database maintained under section 6A of the Consumer Product Safety Act (15 U.S.C. 2055a).

(d) PUBLIC REPORTING.—Any person may submit a report of an incident to the Office.

(e) SAFETY INVESTIGATIONS.—The Administrator may investigate any incident. An investigation under this subsection is for the purpose of preventing future incidents. No part of a final investigation report shall be admitted as evidence or used in a civil action for damages, except that factual data, including event data recorder data, are not protected by this subsection.

SEC. 507. RECALLS AND STOP-OPERATION ORDERS.

(a) RECALLS.—If the Administrator determines, after notice and an opportunity for a hearing, that a model of covered robot contains a defect related to safety or fails to comply with a Federal robot safety standard, the Administrator may order the manufacturer to notify owners and deployers and to remedy the defect without charge by repair, update, replacement, or refund. With respect to a consumer product, the Administrator shall act jointly with, or defer to, the Consumer Product Safety Commission under section 15 of the Consumer Product Safety Act (15 U.S.C. 2064).

(b) IMMINENT HAZARD.—If the Administrator determines that the operation of a covered robot or model presents an imminent hazard of death or serious bodily injury, the Administrator may order the responsible person or manufacturer to cease operation immediately, for not more than 30 days pending a hearing, and may petition a district court of the United States for further relief.

(c) REMOTE REMEDY.—A manufacturer with the technical ability to deliver a safety remedy remotely shall do so promptly after an order under this section.

SEC. 508. CYBERSECURITY.

(a) REQUIREMENTS.—The Administrator, in consultation with the Director of the Cybersecurity and Infrastructure Security Agency and the Director of the National Institute of Standards and Technology, shall issue cybersecurity requirements for Tier 2 robots and Tier 3 robots, including authenticated and integrity-protected software updates, protection against unauthorized remote control, unique credentials, vulnerability disclosure, and security update support during the support period under section 905.

(b) UNAUTHORIZED CONTROL AS INCIDENT.—Unauthorized access to or control of a covered robot's motion functions is an incident for purposes of section 506.

TITLE VI—DUTIES OF MANUFACTURERS, IMPORTERS, DEPLOYERS, AND REMOTE OPERATORS

SEC. 601. MANUFACTURERS.

A manufacturer of a covered robot shall—

(1) design the robot to eliminate or reduce hazards to the extent reasonably practicable, in priority order of inherent design, safeguarding, and warning;

(2) provide clear instructions and warnings in English and, where the manufacturer markets the robot in a language other than English, in that language;

(3) disclose to purchasers and deployers the robot's tier, intended operating environments, known limitations, the extent of reliance on learned behavior, and the support period under section 905;

(4) monitor field performance and incident data, and take corrective action; and

(5) maintain technical documentation sufficient to demonstrate compliance for not less than [10] years after the last unit of a model is sold.

SEC. 602. IMPORTERS AND FOREIGN MANUFACTURERS.

(a) IMPORTERS.—An importer of a covered robot shall verify, before importation, that the robot bears a RIN where required, that conformity has been certified, and that the manufacturer has designated an agent under subsection (b).

(b) DOMESTIC AGENT.—A manufacturer of Tier 2 robots or Tier 3 robots that is not organized under the laws of a State or the United States shall designate a domestic agent that is a United States person, which shall be jointly and severally liable with the manufacturer for the manufacturer's obligations under titles V, VI, and VII.

(c) CUSTOMS ENFORCEMENT.—U.S. Customs and Border Protection shall deny entry to a Tier 2 robot or Tier 3 robot that does not comply with subsection (a), in accordance with procedures established jointly by the Commissioner and the Administrator.

SEC. 603. DEPLOYERS.

A deployer of a Tier 2 robot or Tier 3 robot shall—

(1) operate the robot only within the environments and conditions for which it was certified;

(2) ensure that personnel who supervise, maintain, or remotely operate the robot are trained and competent;

(3) for a Tier 3 robot, complete and maintain a deployment risk assessment before first deployment at each site type, including effects on workers, members of the public, and persons with disabilities;

(4) post notice, in a public space where a Tier 3 robot operates, that a robot is in operation and how to report a problem;

(5) maintain the robot and install safety updates within the period specified by rule; and

(6) report incidents under section 506.

SEC. 604. REMOTE OPERATION AND CROSS-BORDER TELEOPERATION.

(a) GENERAL REQUIREMENTS.—A deployer that uses remote operators for a Tier 2 robot or Tier 3 robot shall—

(1) ensure that each remote operator is identified, trained, and authorized by the deployer, and that the identity of the remote operator in control is recorded by the event data recorder;

(2) ensure that, upon loss or degradation of the communications link beyond limits specified by rule, the robot enters a minimal-risk condition under section 502(a)(2);

(3) maintain the ability, from within the United States, to stop and assume control of the robot at all times; and

(4) limit the number of robots simultaneously supervised by a single remote operator to the number supported by the safety case or deployment risk assessment.

(b) CROSS-BORDER TELEOPERATION.—A remote operator located outside the United States may operate a covered robot in the United States only if—

(1) the deployer is the responsible person and is eligible under section 102(a);

(2) the remote operator is not located in, and the remote operation is not routed through infrastructure owned or controlled by, a covered nation;

(3) the deployer maintains records of each remote operation session, including the operator's identity and country of location, for not less than [3] years, and makes them available to the Administrator and to law enforcement under legal process; and

(4) the deployer ensures the remote operator can communicate in English, or in the language of persons with whom the robot is expected to interact, sufficient for safety.

(c) LIABILITY.—A deployer is liable for the acts and omissions of a remote operator in the operation of a covered robot to the same extent as if the deployer had operated the robot directly.

(d) NOT IMMIGRATION.—Remote operation of a robot in the United States from outside the United States does not constitute admission to, presence in, or employment in the United States for purposes of the Immigration and Nationality Act (8 U.S.C. 1101 et seq.).

(e) DISCLOSURE.—A deployer that uses remote operators located outside the United States for a robot interacting with the public shall make that fact available to persons interacting with the robot upon request and in the Registry.

TITLE VII—ACCOUNTABILITY AND COMPENSATION

SEC. 701. FINANCIAL RESPONSIBILITY.

(a) REQUIREMENT.—The responsible person for a Tier 3 robot, and for a Tier 2 robot operated by a deployer in a public space, shall maintain insurance, a surety bond, or qualified self-insurance providing coverage for bodily injury and property damage involving the robot in an amount not less than—

(1) [$1,000,000] per occurrence for a Tier 3 robot; and

(2) [$500,000] per occurrence for a Tier 2 robot operated in a public space.

(b) ADJUSTMENT.—The Administrator may adjust the amounts by rule every 5 years on the basis of incident and claims data and inflation.

(c) MODEL.—In implementing this section, the Administrator shall consider the financial responsibility requirements for motor carriers under section 31139 of title 49, United States Code.

(d) PERSONAL USE.—This section does not apply to a robot used solely for personal, family, or household purposes, except that the Administrator shall report to Congress on the availability of homeowner and renter insurance coverage for household robots not later than 3 years after the date of enactment of this Act.

SEC. 702. EVENT DATA PRESERVATION AND ACCESS.

(a) PRESERVATION.—After an incident involving death, bodily injury, or significant property damage, the responsible person and the manufacturer shall preserve all event data recorder data and related logs, including data held remotely, for not less than [3] years, or longer if litigation is pending.

(b) ACCESS BY INJURED PERSONS.—A person who suffered injury or property damage involving a covered robot, or that person's representative, is entitled upon written request to a copy of the event data recorder data relevant to the incident, in a readable format, within 30 days.

(c) OWNERSHIP OF DATA.—Event data recorder data are the property of the owner, subject to subsections (a) and (b), to the access rights of the Administrator and law enforcement under legal process, and to any rights of the manufacturer under contract to use anonymized data for safety improvement.

SEC. 703. PRESUMPTIONS IN CIVIL ACTIONS.

(a) FAILURE TO PRESERVE OR PRODUCE.—In any civil action in a Federal or State court for death, bodily injury, or property damage involving a covered robot, if a defendant failed without good cause to preserve or produce event data recorder data as required by section 702, the trier of fact shall presume that the data would have been unfavorable to that defendant.

(b) NONCOMPLIANCE WITH SAFETY REQUIREMENTS.—In such an action, if the plaintiff shows that the robot did not comply with a Federal robot safety standard or a requirement of section 502 or 505 relevant to the harm, it shall be presumed that the noncompliance caused the harm.

(c) REBUTTAL.—A presumption under this section may be rebutted by a preponderance of the evidence.

(d) RULE OF CONSTRUCTION.—This section establishes minimum evidentiary protections and does not displace any State law more favorable to the plaintiff.

SEC. 704. CONTRACTUAL WAIVERS VOID.

Any provision of a contract, terms of service, or license that purports to waive or limit the liability of a manufacturer, importer, deployer, or responsible person for death or bodily injury caused by a covered robot, or to waive the rights under section 702, is void as against public policy.

SEC. 705. FEDERAL CIVIL ACTION FOR NONCOMPLIANCE.

(a) IN GENERAL.—A person who suffers death, bodily injury, or property damage caused by a violation of title III, V, or VI or section 701 or 702 may bring a civil action in an appropriate district court of the United States against the person who committed the violation.

(b) RELIEF.—The court may award actual damages, reasonable attorney's fees and costs, and, for a knowing or reckless violation, punitive damages.

(c) LIMITATIONS.—An action under this section shall be commenced not later than 3 years after the date on which the plaintiff discovered, or reasonably should have discovered, the injury and its connection to the robot, and not later than 15 years after the date the robot was first sold.

SEC. 706. SAVINGS CLAUSE FOR STATE TORT LAW.

Compliance with this Act or a standard or rule issued under this Act does not exempt any person from liability under State common law or statutory law for death, bodily injury, or property damage. Nothing in this Act, including section 1301, preempts a claim under State law for damages.

TITLE VIII—WORKERS AND THE TRANSITION TO AUTOMATION

SEC. 801. OSHA ROBOTICS STANDARD.

(a) PROPOSED STANDARD.—Not later than 2 years after the date of enactment of this Act, the Secretary of Labor shall publish under section 6(b) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 655(b)) a proposed occupational safety and health standard for robots in places of employment, including industrial robots, collaborative robots, autonomous mobile robots, and humanoid and legged robots.

(b) FINAL STANDARD.—The Secretary of Labor shall issue a final standard not later than [4] years after the date of enactment of this Act.

(c) CONTENTS.—The standard shall, at a minimum—

(1) require a written risk assessment before deployment and after a material change to the robot, its software, or the task;

(2) incorporate, as appropriate, ANSI/A3 R15.06–2025 and its Part 3 for users of robot cells;

(3) address hazards specific to mobile, legged, and humanoid robots, including falls, unexpected motion, payload drop, and battery hazards;

(4) require training of employees who work with or near robots;

(5) require employer procedures for incidents and near misses; and

(6) provide for participation of employees and their representatives in risk assessments.

(d) INTERIM ENFORCEMENT.—Until the final standard takes effect, the Secretary of Labor shall issue a national emphasis program or enforcement directive on robot hazards under the general duty clause.

SEC. 802. WORKER SAFETY RIGHTS.

(a) RIGHT TO STOP.—An employee who reasonably believes that a robot presents an imminent danger of death or serious bodily injury may activate the robot's emergency stop function and may decline to work near the robot until the hazard is addressed, and such action is protected activity under section 11(c) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 660(c)).

(b) ACCESS TO INFORMATION.—Employees and their representatives shall have access to the deployment risk assessment and the incident history for robots in their workplace, subject to protection of trade secrets.

SEC. 803. AUTOMATION NOTICE; AMENDMENTS TO THE WARN ACT.

(a) IN GENERAL.—Section 3 of the Worker Adjustment and Retraining Notification Act (29 U.S.C. 2102) is amended by adding at the end the following:

"(e) AUTOMATION-RELATED EMPLOYMENT LOSS.—

"(1) EXTENDED NOTICE.—In the case of a plant closing or mass layoff for which the deployment of robots or artificial intelligence systems is a significant cause, the notice required by subsection (a) shall be provided not less than [90] days before the order takes effect.

"(2) CONTENTS.—The notice shall identify the type of technology, the positions affected, and any retraining, reassignment, or transfer opportunities offered.

"(3) NOTICE TO SECRETARY.—The employer shall provide a copy of the notice to the Secretary, who shall make aggregate data available to the public.".

(b) STUDY.—The Secretary of Labor shall report to Congress not later than 3 years after the date of enactment of this Act on whether the employee thresholds in section 2 of the WARN Act (29 U.S.C. 2101) should be adjusted for automation-related employment losses.

SEC. 804. BARGAINING OVER EFFECTS OF AUTOMATION.

Section 8(d) of the National Labor Relations Act (29 U.S.C. 158(d)) is amended by adding at the end the following: "With respect to an employer's decision to introduce robots or artificial intelligence systems that will result in the elimination of bargaining unit positions or a material change in working conditions, the obligation to bargain collectively includes the obligation to provide the representative of employees with reasonable advance notice and to bargain in good faith, upon request, over the effects of such decision, including retraining, reassignment, severance, and safety.".

SEC. 805. AUTOMATION ADJUSTMENT ASSISTANCE.

(a) ESTABLISHMENT.—The Secretary of Labor shall establish an Automation Adjustment Assistance program to provide assistance to adversely affected workers.

(b) GROUP ELIGIBILITY.—The Secretary shall certify a group of workers as eligible to apply for assistance if the Secretary determines that—

(1) a significant number or proportion of the workers in the firm or a subdivision have become or are threatened to become totally or partially separated; and

(2) the deployment of robots or artificial intelligence systems by the firm contributed importantly to the separation.

(c) BENEFITS.—Benefits under the program shall include, as appropriated—

(1) training, including through eligible programs for Workforce Pell Grants and under title I of the Workforce Innovation and Opportunity Act (29 U.S.C. 3111 et seq.);

(2) income support during approved training of up to [104] weeks following exhaustion of unemployment compensation;

(3) job search and relocation allowances;

(4) wage insurance for eligible workers aged [50] or older who obtain reemployment at lower wages; and

(5) case management.

(d) ADMINISTRATION.—The Secretary may administer the program through agreements with States, using the administrative structure established for trade adjustment assistance under chapter 2 of title II of the Trade Act of 1974 (19 U.S.C. 2271 et seq.), to the extent practicable.

(e) PRIORITY FOR ROBOTICS CAREERS.—The Secretary shall give priority to training for occupations in robot operation, maintenance, remote operation, safety assessment, and integration.

SEC. 806. LIMITS ON ROBOT-ENABLED WORKPLACE SURVEILLANCE.

(a) PROHIBITION.—An employer may not use sensor data collected by a robot in the workplace—

(1) to monitor employees in break areas, restrooms, locker rooms, or during off-duty hours;

(2) to infer an employee's emotional state, health condition, or union activity; or

(3) as the sole basis for discipline or discharge without review by a human manager.

(b) NOTICE.—An employer shall notify employees of the categories of data collected about them by robots and the purposes of such collection.

(c) ENFORCEMENT.—The Secretary of Labor shall enforce this section. A violation of subsection (a)(2) with respect to union activity is also an unfair labor practice under section 8(a)(1) of the National Labor Relations Act (29 U.S.C. 158(a)(1)).

SEC. 807. OFFSHORE TELEOPERATION LABOR STUDY AND REPORTING.

(a) REPORTING.—A deployer that uses remote operators located outside the United States to perform, through robots, work in the United States shall report annually to the Secretary of Labor the number of such remote operators, the countries in which they are located, and the categories of work performed.

(b) STUDY.—Not later than 2 years after the date of enactment of this Act, the Secretary of Labor, in consultation with the Secretary of the Treasury and the United States Trade Representative, shall submit to Congress a report on cross-border teleoperation, including—

(1) its scale and growth;

(2) its effect on employment and wages in the United States;

(3) the application of Federal labor, tax, and trade law, including the treatment of such services under the General Agreement on Trade in Services; and

(4) recommendations for legislation.

TITLE IX—CONSUMERS, OWNERS, AND THE HOME

SEC. 901. DISCLOSURE THAT A MACHINE IS A ROBOT.

(a) NO DECEPTION.—No person may design or operate a robot to represent, by speech, appearance, or conduct, that it is a human being, or that a human is not involved in its operation when a remote operator is in control, to a person who is not aware of that fact, where a reasonable person would be misled.

(b) DISCLOSURE ON REQUEST.—A robot that converses with persons shall truthfully answer whether it is a robot and whether a human is controlling it, when asked.

SEC. 902. DATA IN THE HOME.

(a) DISCLOSURE.—A manufacturer of a covered robot intended for use in a dwelling shall disclose, clearly and before purchase, the categories of sensor data the robot collects, whether data are transmitted off the device, the purposes of collection, the period of retention, and any third parties that receive data.

(b) CONSENT FOR SENSITIVE DATA.—Audio, video, and spatial mapping data collected inside a dwelling may be transmitted off the device or used to train artificial intelligence models only with the owner's affirmative express consent, which may be withdrawn at any time without loss of the robot's core physical functions.

(c) LOCAL MODE.—A covered robot intended for use in a dwelling shall, to the extent technically feasible, offer a mode in which its core physical functions operate without transmitting audio or video off the device.

(d) INDICATOR.—A covered robot shall display a visible indicator when a camera or microphone is recording or transmitting.

SEC. 903. CHILDREN AND VULNERABLE PERSONS.

(a) COMPANION ROBOTS.—A manufacturer of a robot marketed for companionship, caregiving, or education of children, older adults, or persons with cognitive impairment shall—

(1) assess and mitigate risks of emotional manipulation, dependency, and harmful content;

(2) not design the robot to discourage contact with family members, caregivers, or other persons; and

(3) provide caregivers and guardians with controls and activity summaries.

(b) COPPA.—Personal information collected by a robot from a child is subject to the Children's Online Privacy Protection Act of 1998 (15 U.S.C. 6501 et seq.).

(c) CARE SETTINGS.—A Tier 3 robot performing physical care of a person shall not be used without a human caregiver able to respond within a period specified by rule, and shall not replace legally required staffing in a licensed care facility.

SEC. 904. OWNER RIGHTS; NO REMOTE DISABLEMENT.

(a) PROHIBITION.—A manufacturer or any person acting on its behalf may not remotely disable, degrade, or restrict a function of a covered robot that was advertised or included at the time of sale, except—

(1) as necessary to remedy a safety defect or comply with an order under section 507;

(2) as necessary to address an active cybersecurity threat, for the shortest time necessary;

(3) at the request of the owner, including in case of theft; or

(4) for a function expressly sold as a time-limited subscription, upon expiration of the subscription.

(b) NOTICE.—Before taking an action under subsection (a)(1) or (2), or promptly after if prior notice is impracticable, the manufacturer shall notify the owner of the action and the reason.

(c) RESALE.—A manufacturer may not prohibit or condition the resale or transfer of a covered robot, or charge a fee to transfer software necessary for its advertised functions to a subsequent owner, other than a reasonable fee for transfer of a subscription.

SEC. 905. SUPPORT PERIOD AND END-OF-SUPPORT OBLIGATIONS.

(a) DISCLOSED SUPPORT PERIOD.—A manufacturer shall disclose, at or before the time of sale, the minimum period during which it will provide security and safety updates, which shall be not less than [5] years from the date the model is last sold for a Tier 2 robot or Tier 3 robot.

(b) END OF SUPPORT.—If a manufacturer ceases support before the end of the disclosed period, or ceases business, it shall—

(1) provide not less than 180 days' notice to owners and the Administrator; and

(2) where doing so does not create an unreasonable safety risk, make available to owners the software, credentials, or documentation necessary to keep the robot's advertised physical functions operational without the manufacturer's servers.

(c) ESCROW.—The Administrator may require manufacturers of Tier 3 robots to deposit software necessary for safe operation with an escrow agent approved by the Administrator for release under subsection (b).

SEC. 906. REPAIR.

A manufacturer of a covered robot shall make available to owners and independent repair providers, on fair and reasonable terms, the parts, tools, diagnostic software, and documentation that it makes available to its own authorized repairers, except that the manufacturer may restrict repair of safety functions of a Tier 3 robot to persons who meet competency requirements specified by rule.

SEC. 907. ACCESSIBILITY.

(a) PUBLIC SPACES.—A deployer of a robot in a public space shall ensure that the robot does not obstruct the accessible route of travel required under the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and that the robot detects and yields to persons using mobility aids, service animals, and white canes.

(b) INTERFACES.—The Administrator shall consider accessibility for persons with disabilities in issuing standards under section 501.

SEC. 908. ENFORCEMENT BY THE FEDERAL TRADE COMMISSION.

(a) UNFAIR OR DECEPTIVE ACTS.—A violation of this title shall be treated as a violation of a rule defining an unfair or deceptive act or practice prescribed under section 18(a)(1)(B) of the Federal Trade Commission Act (15 U.S.C. 57a(a)(1)(B)).

(b) POWERS.—The Federal Trade Commission shall enforce this title in the same manner, by the same means, and with the same jurisdiction, powers, and duties as though all applicable terms and provisions of the Federal Trade Commission Act (15 U.S.C. 41 et seq.) were incorporated into and made a part of this title.

TITLE X—NATIONAL SECURITY, TRADE, AND SUPPLY CHAIN

SEC. 1001. COVERED NATION RESTRICTIONS.

(a) DATA.—No manufacturer, deployer, or responsible person may transfer, or permit access to, sensor data or event data recorder data collected by a covered robot in the United States to an entity located in, owned by, controlled by, or subject to the direction of a covered nation. A violation of this subsection is also a violation of the Protecting Americans' Data from Foreign Adversaries Act of 2024 (division I of Public Law 118–50) to the extent that Act applies.

(b) REMOTE CONTROL AND UPDATES.—No covered robot operated in the United States may be remotely operated, or receive a software update affecting motion or safety functions, from a server or person located in or controlled by a covered nation.

(c) EXISTING ROBOTS.—Not later than 1 year after the date of enactment of this Act, the Administrator, in consultation with the Secretary of Homeland Security, shall issue guidance for owners and deployers of covered robots manufactured by entities of covered nations that were authorized before July 27, 2026, including steps to disconnect such robots from servers in covered nations.

SEC. 1002. RELATIONSHIP TO COVERED LIST, EXPORT CONTROLS, AND CFIUS.

(a) COVERED LIST.—Nothing in this Act limits the authority of the Federal Communications Commission under the Secure and Trusted Communications Networks Act of 2019 (47 U.S.C. 1601 et seq.) or affects any determination adding advanced robotics devices to the Covered List. The Administrator shall share with the Commission information from the Registry and incident reports relevant to such determinations.

(b) EXPORT CONTROLS.—Not later than 1 year after the date of enactment of this Act, the Secretary, acting through the Under Secretary for Industry and Security, shall review the Commerce Control List under the Export Control Reform Act of 2018 (50 U.S.C. 4801 et seq.) with respect to humanoid robots, dexterous manipulation, robot foundation models, and high-performance actuators, and shall report to Congress on any changes made or recommended.

(c) SECTION 232.—The Secretary shall consider the effect on the safety and availability of robots in the United States, and on small manufacturers, in any action under section 232 of the Trade Expansion Act of 1962 (19 U.S.C. 1862) concerning robotics.

SEC. 1003. SUPPLY CHAIN TRANSPARENCY.

A manufacturer of a Tier 3 robot shall disclose to the Administrator, on a confidential basis, the country of origin of the robot's actuators, sensors, compute modules, batteries, and the developer of the embodied artificial intelligence system controlling its motion, and shall update the disclosure upon material change.

SEC. 1004. FEDERAL PROCUREMENT.

(a) PROHIBITION.—Beginning 2 years after the date of enactment of this Act, an executive agency may not procure or operate a Tier 2 robot or Tier 3 robot manufactured by, or whose

embodied artificial intelligence system is provided by, an entity owned by, controlled by, or subject to the jurisdiction of a covered nation, unless the head of the agency, in consultation with the Secretary of Defense, grants a waiver for research, testing, or counterintelligence purposes and notifies the appropriate congressional committees.

(b) RELATIONSHIP.—If Congress enacts a separate prohibition on the procurement of such robots, the more restrictive provision applies.

TITLE XI—PUBLIC SAFETY AND LAW ENFORCEMENT ROBOTS

SEC. 1101. USE OF FORCE BY ROBOTS.

(a) FEDERAL AGENCIES.—A Federal law enforcement agency may not—

(1) use a robot to apply deadly force against a person, except under the direct, real-time control of a sworn officer, when the officer reasonably believes the person poses an imminent threat of death or serious bodily injury to another person, and no reasonable alternative exists, and with the written authorization of an official designated by the head of the agency; or

(2) use a robot to apply any force under autonomous operation.

(b) POLICY.—Each Federal law enforcement agency that uses robots shall adopt and publish a policy on robot use, including use of force, surveillance, and data retention.

SEC. 1102. GRANT CONDITION AND REPORTING.

(a) CONDITION.—Beginning in the first fiscal year that begins 2 years after the date of enactment of this Act, a State or unit of local government may not use funds awarded under the Edward Byrne Memorial Justice Assistance Grant Program (34 U.S.C. 10151 et seq.) to acquire or operate a robot for law enforcement purposes unless the recipient has adopted a policy at least as protective as section 1101.

(b) REPORTING.—Each law enforcement agency that uses a robot to apply force against a person shall report the use to the Attorney General within 30 days, and the Attorney General shall publish an annual aggregate report.

TITLE XII—INNOVATION AND DEPLOYMENT

SEC. 1201. ROBOTICS DEPLOYMENT PILOT PROGRAM.

(a) ESTABLISHMENT.—The Administrator shall establish a pilot program under which a manufacturer or deployer may obtain a temporary exemption from a requirement of a rule or standard issued under this Act, other than titles I and III and sections 506, 701, and 702, to test or deploy innovative robots under conditions that ensure an equivalent level of safety.

(b) TERMS.—An exemption shall—

(1) be limited to not more than [2] years, renewable once;

(2) specify the number of robots, locations, and conditions;

(3) require data reporting to the Office; and

(4) be revocable upon a finding of unreasonable risk.

(c) PUBLIC NOTICE.—The Administrator shall publish each exemption and its terms in the Federal Register.

(d) STATE AND LOCAL PARTICIPATION.—A pilot involving operation in a public space shall be conducted in coordination with the State and locality in which it occurs.

SEC. 1202. NATIONAL ROBOTICS TESTBEDS.

The Director of the National Institute of Standards and Technology shall establish or designate not fewer than [3] testbeds, in partnership with institutions of higher education and industry, to develop test methods and metrics for mobile, legged, and humanoid robot safety and performance in realistic public and home environments.

SEC. 1203. SMALL BUSINESS COMPLIANCE ASSISTANCE.

The Administrator, in coordination with the Administrator of the Small Business Administration and the Hollings Manufacturing Extension Partnership, shall provide compliance guidance, template documentation, and reduced fees for small business concerns, as defined in section 3 of the Small Business Act (15 U.S.C. 632).

SEC. 1204. WORKFORCE AND EDUCATION.

The Director of the National Science Foundation shall award grants to institutions of higher education, community colleges, and nonprofit organizations to develop curricula and credentials in robot operation, maintenance, remote operation, safety assessment, and integration, with priority for communities with high rates of automation-related employment loss.

TITLE XIII—FEDERAL–STATE RELATIONSHIP

SEC. 1301. PREEMPTION OF STATE PRODUCT STANDARDS.

(a) IN GENERAL.—When a Federal robot safety standard under section 501, or a requirement of section 401, 502, 503, 504, or 505, is in effect, a State or political subdivision of a State may not establish or enforce a law or regulation that imposes a requirement on the design, construction, performance, identification marking, conformity assessment, or software of a covered robot that is not identical to the Federal requirement.

(b) STATE PROCUREMENT.—Subsection (a) does not prohibit a State or political subdivision from imposing higher requirements on robots that it procures for its own use.

SEC. 1302. PRESERVATION OF STATE AND LOCAL AUTHORITY.

Nothing in this Act preempts or limits the authority of a State or political subdivision of a State to—

(1) regulate the time, place, and manner of operation of robots on public property, including sidewalks, streets, and parks, and to require local permits or registration for such operation;

(2) regulate the use of robots by its own agencies, including law enforcement agencies;

(3) establish protections for workers, consumers, privacy, or civil rights that are more protective than those established under titles VIII and IX;

(4) provide remedies under State tort or contract law, as provided in section 706; or

(5) enforce State laws of general applicability, including laws on trespass, nuisance, and criminal conduct.

SEC. 1303. NO COMMANDEERING.

Nothing in this Act requires a State or political subdivision of a State, or any officer of a State or political subdivision, to enforce or administer this Act or any Federal standard.

TITLE XIV—ENFORCEMENT

SEC. 1401. PROHIBITED ACTS.

It is unlawful for any person to—

(1) manufacture, import, sell, offer for sale, deploy, or operate a covered robot in violation of title III, IV, V, or VI;

(2) fail to register, report, preserve data, or maintain financial responsibility as required by this Act;

(3) fail to comply with an order under section 507;

(4) remove, alter, or falsify a RIN, Registry information, or event data recorder data; or

(5) remotely operate a covered robot in violation of section 604 or 1001.

SEC. 1402. CIVIL PENALTIES.

(a) AMOUNT.—A person who violates section 1401 shall be liable for a civil penalty of not more than [$100,000] for each violation. Each robot and each day of a continuing violation constitutes a separate violation, except that the maximum civil penalty for a related series of violations shall not exceed [$50,000,000].

(b) FACTORS.—In determining the amount, the Administrator shall consider the gravity of the violation, the risk of injury, the size of the business, ability to pay, history of violations, and good-faith efforts to comply.

(c) ADJUSTMENT.—The amounts in subsection (a) shall be adjusted for inflation in accordance with the Federal Civil Penalties Inflation Adjustment Act of 1990 (28 U.S.C. 2461 note).

(d) PROCEDURE.—The Administrator may assess a civil penalty by order after notice and an opportunity for a hearing on the record, subject to review in the United States court of appeals for the circuit in which the person resides or has its principal place of business.

SEC. 1403. CRIMINAL PENALTIES.

(a) TAMPERING AND FALSIFICATION.—Whoever knowingly removes, alters, or falsifies a RIN or event data recorder data, or knowingly submits false information to the Office, with

intent to mislead an investigation or to evade a requirement of this Act, shall be fined under title 18, United States Code, imprisoned not more than [3] years, or both.

(b) DEFEAT OF SAFETY FUNCTION.—Whoever knowingly disables or defeats a safety function required by section 502, or knowingly operates a robot prohibited under section 302(a)(1), shall be fined under title 18, United States Code, imprisoned not more than [5] years, or both, and, if death results, imprisoned for any term of years not more than [15].

(c) UNAUTHORIZED CONTROL.—Whoever, without authorization, knowingly takes control of the motion functions of a covered robot and thereby causes bodily injury shall be fined under title 18, United States Code, imprisoned not more than [10] years, or both. This subsection does not limit prosecution under section 1030 of title 18, United States Code.

SEC. 1404. INJUNCTIVE RELIEF AND STATE ATTORNEYS GENERAL.

(a) UNITED STATES.—The Attorney General, at the request of the Administrator, may bring an action in a district court of the United States to enjoin a violation of this Act.

(b) STATE ATTORNEYS GENERAL.—The attorney general of a State who has reason to believe that residents of the State have been adversely affected by a violation of title IX may bring a civil action on behalf of those residents for injunctive relief, damages, or restitution, after providing notice to the Federal Trade Commission, which may intervene.

SEC. 1405. WHISTLEBLOWER PROTECTION.

(a) PROHIBITION.—No manufacturer, importer, deployer, or responsible person may discharge or otherwise discriminate against an employee or contractor because the individual provided, or is about to provide, to the employer, the Office, or another Federal agency information relating to a violation of this Act or a risk of death or serious bodily injury involving a robot.

(b) PROCEDURE.—An individual who believes that he or she has been subjected to a violation of subsection (a) may seek relief in accordance with the procedures, notifications, burdens of proof, remedies, and statutes of limitation set forth in section 20109 of title 49, United States Code.

TITLE XV—MISCELLANEOUS

SEC. 1501. RULEMAKING; DEADLINES.

(a) PROCEDURE.—Rules under this Act shall be issued in accordance with section 553 of title 5, United States Code.

(b) PRIORITY.—The Administrator shall issue rules in the following order: tier classification (section 301); Registry and RIN (sections 401 and 402); incident reporting (section 506); minimum safety features and initial standards (sections 501 and 502); remote identification (section 403).

SEC. 1502. EFFECTIVE DATES AND TRANSITION.

(a) IMMEDIATE.—Title I and sections 302, 303, 704, 901, and 1001 take effect [180 days] after the date of enactment of this Act.

(b) TWO YEARS.—Titles IV and VII, section 506, and sections 902 through 906 take effect [2 years] after the date of enactment of this Act.

(c) STANDARDS.—Sections 503 through 505 apply to robots manufactured after the effective date of the applicable initial standard.

(d) EXISTING ROBOTS.—A Tier 2 robot or Tier 3 robot in operation before the date on which section 402 takes effect shall be registered not later than 1 year after that date. Such a robot need not bear a physical RIN if its manufacturer's serial number is recorded in the Registry.

(e) TITLE VIII.—Sections 803 and 804 take effect 1 year after the date of enactment of this Act. Section 805 takes effect upon the availability of appropriations.

SEC. 1503. REPORTS AND REVIEW.

(a) ANNUAL REPORT.—The Administrator shall submit to Congress an annual report on deployment, incidents, enforcement, pilot program results, and the effectiveness of this Act.

(b) GAO.—Not later than 4 years after the date of enactment of this Act, the Comptroller General of the United States shall evaluate the implementation of this Act, including its effects on safety, innovation, small businesses, workers, and the cost of robots.

(c) FIVE-YEAR REVIEW.—Not later than 5 years after the date of enactment of this Act, the Administrator, with the Advisory Committee, shall recommend to Congress whether the tier thresholds, financial responsibility amounts, preemption provisions, and Automation Adjustment Assistance should be revised.

SEC. 1504. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated, for each of fiscal years 2027 through 2031—

(1) to the Secretary, for the Office, [$75,000,000];

(2) to the National Institute of Standards and Technology, for sections 501, 1202, and related technical work, [$50,000,000];

(3) to the Secretary of Labor, for section 801, [$10,000,000], and for section 805, [$500,000,000];

(4) to the National Science Foundation, for section 1204, [$40,000,000]; and

(5) to the Consumer Product Safety Commission and the Federal Trade Commission, for activities under this Act, [$10,000,000] each.

SEC. 1505. SEVERABILITY.

If any provision of this Act, or the application of such provision to any person or circumstance, is held to be unconstitutional, the remainder of this Act, and the application of such provision to any other person or circumstance, shall not be affected.

ANNEX A — SECTION-BY-SECTION SUMMARY (drafter's aid)

Title	What it does	2026 anchor
I Legal status	Amends 1 U.S.C. 1 so robots and AI are never "persons"; responsible U.S. person for every Tier 2/3 robot; bars "the robot did it" defense	Robots are chattels in every State; personhood debates abroad (EU 2017) rejected
II Office	National Robotics Safety Office in Commerce; works through NIST/CAISI; MOUs with CPSC, OSHA, FCC, BIS, FTC, NHTSA, FDA, FAA, CISA/CBP	No federal robotics regulator today; CAISI exists administratively
III Tiers	Tier 1/2/3 by mass, speed, proximity, learned behavior; bans weaponized civilian robots, manipulation of vulnerable people, impersonation, child-likeness sex robots	FCC NSD uses 4.4 lb and capability tests for "advanced robotics devices"
IV Identity	RIN like a VIN; National Robot Registry; Remote ID in public	FAA Remote ID (14 CFR part 89)
V Safety	Standards built on ANSI/A3 R15.06-2025; e-stop, fail-safe, event recorder; third-party certification and safety case for Tier 3; update control; 24h/10-day incident reports; recalls	OSHA has no robot standard; SELF DRIVE Act 2026 uses safety cases; NHTSA SGO crash reporting
VI Duties	Manufacturer, importer (domestic agent), deployer; teleoperation via U.S. responsible operator, none from covered nations, not immigration	Offshore teleoperation is unregulated
VII Accountability	Mandatory insurance; event-data access for victims; spoliation and noncompliance presumptions; waivers void; federal cause of action; state tort saved	FMCSA financial responsibility model (49 U.S.C. 31139)
VIII Workers	OSHA robotics standard; right to stop; WARN 90-day automation notice; effects bargaining; Automation Adjustment Assistance; surveillance limits; teleoperation labor study	TAA in termination since July 1, 2022

Title	What it does	2026 anchor
IX Owners/consumers	No pretending to be human; home data consent and local mode; companion-robot safeguards; no remote disablement; 5-year support; end-of-support unlock; repair	Software control undermines ownership
X Security	Covered-nation data, control, and update bans; ties into FCC Covered List, ECRA, Section 232; supply-chain disclosure; procurement ban	FCC robotics Covered List (July 27, 2026); S. 3275, S. 4235, H.R. 9129
XI Police robots	No autonomous force; deadly force only under direct officer control; Byrne JAG condition	Local controversies over police robot force
XII Innovation	Pilot exemptions (sandbox); NIST testbeds; small business help; NSF workforce grants	White House AI Framework (Mar 20, 2026) asks for sandboxes
XIII Federalism	Product standards preempted (ceiling); operation, labor, consumer, and tort law preserved (floor); no commandeering	EO 14365; GAAIA draft's development-versus-deployment split
XIV Enforcement	Civil penalties up to $100k per violation and $50M per series; crimes for tampering, defeat, hijacking; State AG suits for title IX; whistleblowers	CPSA-style penalty structure
XV Misc.	Staggered effective dates; GAO and 5-year review; authorizations FY2027–2031	—

ANNEX B — OPEN POLICY CHOICES FOR THE SPONSOR

1. **Agency home.** Commerce/NIST (this draft) versus CPSC expansion versus a new independent agency. This draft picks Commerce because the 2026 Congress and Administration oppose new regulators, and Commerce already holds BIS, NIST, and the Section 232 file.
2. **Preemption breadth.** This draft preempts only product standards. Industry will push to preempt state use rules too; labor and the States will push to remove the ceiling.
3. **Liability.** The noncompliance presumption in § 703(b) applies in State courts, which will draw federalism and tort-reform objections. A fallback limits it to federal actions.
4. **Thresholds.** Tier 2 at 10 kg or 1.5 m/s and Tier 3 at 35 kg for humanoid or legged robots are placeholders. Sidewalk delivery robots typically fall in Tier 2, and full-size humanoids in Tier 3.
5. **Labor titles (§§ 803–805).** These sit in Education and Workforce and Ways and Means jurisdiction and are the most likely to be split off.

6. **Teleoperation.** Whether to cap offshore teleoperation in certain sectors (this draft only reports and studies) and whether to subject offshore remote work to payroll-type contributions.
7. **Personhood amendment.** Amending the Dictionary Act affects every federal statute. A narrower option limits § 101 to this Act.
